

LARG

10th April 2013

In attendance

Brian, Patricia, Graham, Victor, & Catherine

Review of the SWC Community Development Presentation

The group read over the evaluation responses from the students

Learning Points

We could include within and finish the session off with some of the positive experiences of engagement & community development approach of social workers. It would be useful to have in advance, from Morgan some information on what the group had covered on community development prior to coming to Willowbank. There didn't seem to be a great deal of understanding from many of the students where Community Development fitted into their roles.

The group agreed that we should ask Morgan to get the group to prepare questions in advance for the group.

One respondent noted they would like more detail on our consultation responses – as these are now available on the website it was agreed to follow this up with Morgan as well as send him a copy of the presentation.

The group felt that the bottom room might be better for future sessions and if we had some small group work with 4 or 5 people in each group they may be able to come up with their own definition of Community Development and this might increase engagement.

2nd May QUB

The session is looking at Attitudes towards Disabled People and will involve a full day leaving Willowbank at 8.30am and returning approximately 5.15pm. People should speak to Patricia about this.

Next Meeting 24th April 2013
